DETAILED ACTION

1. Claims 13-18, 22-33 and 35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5. Applicant's election without traverse of Group I, claims 1-11, 19-21, 34 and 37 in Paper No. 5 is acknowledged, however, upon reconsideration, a further restriction will be required as set forth below (namely between the claims of previous Group I in the 4/2/03 mailed restriction).

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a semiconductor testing machine of the type having a plurality of test probes and an apparatus for cleaning the test probes, classified in class 324, subclass 158.1.
- II. Claims 19-21, 34 and 36, drawn to an apparatus for cleaning tips of probes, classified in class 15, subclass 3.
- III. Claims 37 and 38, drawn to an apparatus for cleaning debris from a semiconductor wafer, classified in class 15, subclass 102.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1744

the instant case, the different inventions of Groups I, II and III each have different functions and effects with respect to one another.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. In addition to the above restriction requirement, Applicant will also be required to elect a single disclosed species as set forth in two parts below. It should be noted that the election of species requirement mailed to Applicant on 4/2/03 has been modified as set forth below and Applicant should re-elect a species as set forth below.

This application contains claims directed to the following patentably distinct species of the claimed invention: 1) Figs. 2A, 2B, 3, 2) Figs. 4A, 4B, 3) Fig. 5, 4) Fig. 7, and 5) Fig. 9.

Further, Applicant will also be required to elect a single disclosed species from one of the following types of rollers:

- 1) tacky roller,
- 2) electrostatic roller, and
- 3) absorbent roller

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randall Chin whose telephone number is (703) 308-
